

Heathfield Primary School, Scotland

Product: 8 no. Rydal Cycle Shelters
Size: 2.1m x 2.7m per shelter
Optional Extras: 26 no. Sheffield Cycle Racks
Contractor: Mansell Construction
Contract Value: £31,000

Heathfield Primary School required a secure cycle parking area within their school grounds in Ayr. This job was contracted by Mansell Construction who is a UK wide contractor with an office local to Heathfield Primary School. The staff at Mansell Construction sent their tender opportunity to Able Canopies and contacted Able Canopies via the telephone to discuss the tender and the options required.

After discussions about the job, Mansell Construction agreed that the Rydal Cycle Shelter would be ideal for the school and requested a quotation for eight Rydal Cycle Shelters.

A quotation was sent to the contractors and they were happy with the price and the quality of the product on offer. The quotation was for eight Rydal Cycle Shelters which were each 2.1m long x 2.7m wide; 26 Sheffield Cycle Racks were also included in this quote as requested for additional cycle storage.

The contractor placed the order and the shelters and cycle racks were installed with no problems along the way.

The Project Manager stated that the installation and product received from Able Canopies was excellent and they would recommend us.

“Works were executed in a safe and well executed manor.” – Project Manger.
